

bezier.rb - Creates a complex curve with two reference points instead of just one.

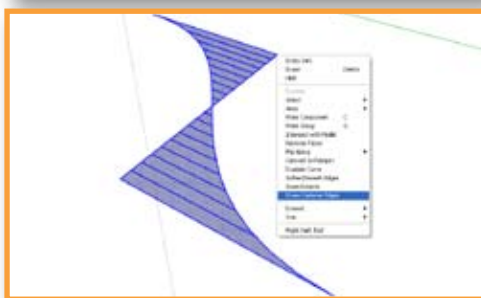

make_faces.rb - Makes a solid face between coplanar edges

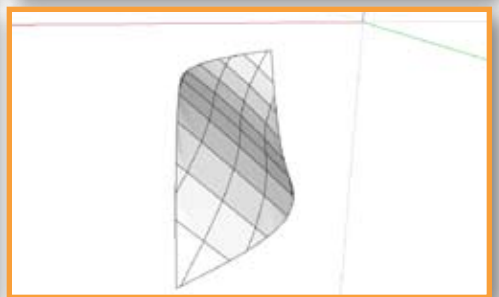

extend11.rb - Trims or Extends line segments to a selected edge.

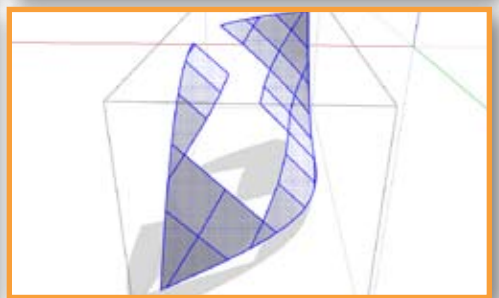

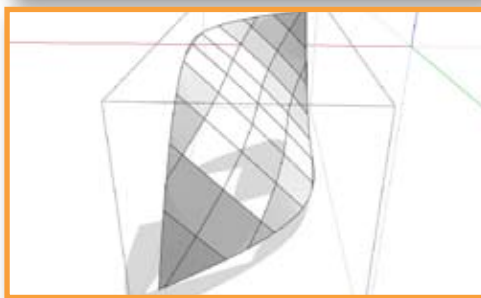

cleanup.rb - Erases any line that does not necessary in defining a given shape

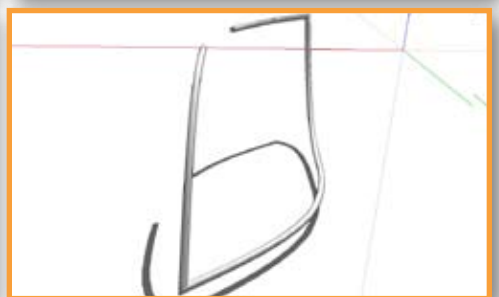

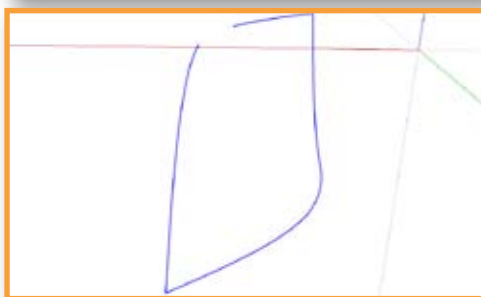

SoapBubble Tool
- Creates a surface from a non-planer path.
Very valuable tool when modeling complex shapes

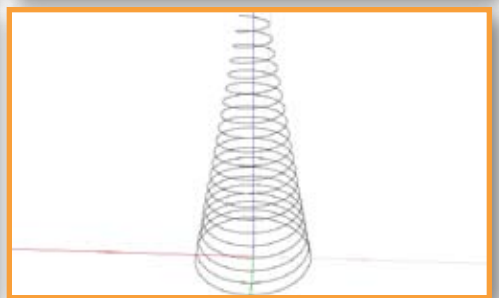

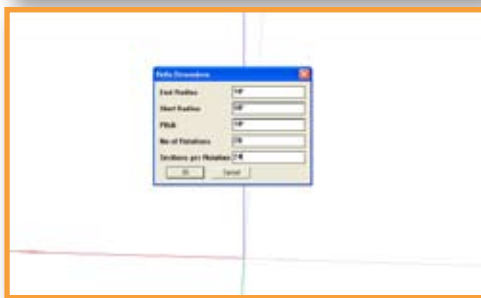

erase_lonely_edges.rb
- Erases any line that is not relevant to a face.

TubeAlongPath.rb
- Allows you to enter the radius of a circle or polygon to follow a given path

drawhelix13.rb - Makes cool spirals for springs or fake Christmas Trees!

curvestitcher21.rb
- Stitches a face between coplanar edges.
